- **Others:** Git, Agile Methodology, Docker

Experience/OJT

Internship:

August 2022
to
July 2023

Sun Asterisk Philippines
- Junior Web Developer

(Remote)

Projects:

E-Learning System (ELS)

Developed a fully functional e-learning system website using React JS, Tailwind and Laravel REST API. Implemented a user and admin feature, creating questions and answers, view total score, view learned categories, can follow another user and admin have the full access.

Messenger clone APP

Developed a Messenger clone app using Flutter and Firestore. Working with UI and Implemented a simple CRUD operation.

Learning Management System (LMS)

Developed and contributed to our simulation project for the new employee on my previous company using React JS, Tailwind, TypeScript, React Redux Toolkit, and Django RESTful API. We have a UI/UX designer and all we do is turn that design (Figma) into a working code. We implemented a user and admin feature with Google sign in, can create courses, learning path for the new employee if what they should learn and manage their learning path.

Languages:

- English: Basic proficiency
